PROFESSIONAL SUMMARY

Full Stack Developer based in Pakistan with over 3 years in web development, working on projects ranging from online stores to internal business tools. Comfortable on both ends of the stack - HTML5, CSS3, JavaScript, React.js and Node.js on the front, PHP, MySQL and MongoDB on the back, tying it all together with REST APIs. Currently employed full-time, where daily work covers everything from writing code to shipping it live and keeping it running.

CORE SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Design

Backend: PHP, Node.js, Python (FastAPI), REST APIs

Databases: MySQL, MongoDB, Schema Design, Query Writing

Tools: Git, GitHub, VS Code, Postman, Figma, Adobe Illustrator

Other: User Login & Access Control, Testing & Debugging, App Deployment, Client Coordination

PROFESSIONAL EXPERIENCE

Full Stack Web Developer | Clea Dental SMC Pvt Limited June 2025 - Present

- Handle both ends of the application - building out user-facing pages and writing the backend logic behind them.
- Set up and connect REST APIs, hook in outside services, and keep both SQL and NoSQL databases running smoothly.
- Set up login systems and permission levels, and structure databases so they hold up as the app grows.
- Track down bugs across the codebase, review teammates' code, and push updates out to live servers.
- Work closely with management to turn business needs into working features, staying on top of deadlines.

Freelance Full Stack Developer | Self-Employed 2024 - Present

- Took 4+ projects from a blank page to a live product, including online stores and dashboards for managing operations.
- Added role-based logins, connected APIs, built admin panels, and pushed finished sites live for clients.
- Ran client conversations, scoped out project details, and kept multiple jobs moving on their own timelines.

Junior Web Developer (Intern) | -

2023

- Put together admin dashboards for internal use with PHP and MySQL, plus the frontend screens to go with them.
- Wired up REST APIs while working as part of a small agile team.

FEATURED PROJECTS

Winder & Stilhaus - Instant Pricing Guide

Technologies: Next.js, React.js, Node.js, JavaScript, Tailwind CSS

- A pricing tool built end-to-end for production use, with a clean, responsive interface.

Blackstone - Attorney Address Book

Technologies: PHP (CodeIgniter HMVC), MySQL, Node.js, JavaScript

- An admin panel for a legal AI product, built on CodeIgniter's HMVC structure with a Node.js backend tying into multiple AI services.

Blanc Systems - Agency Website

Technologies: Next.js 14 (App Router), React.js, JavaScript

- A polished agency site with heavy use of animation, built using Next.js 14's App Router.

Luno Jewels - eCommerce Store & Dashboard

Technologies: PHP, MySQL, JavaScript, CSS3

- A jewelry store site with filtering, wishlists, cart and checkout, plus a dashboard to manage it all from the back end.

Hospital Management System

Technologies: PHP, MySQL, JavaScript

- Keeps track of patient records, doctor schedules, appointments, billing and medical history in one place.

EduCore - School Management System

Technologies: PHP, MySQL, JavaScript

- Covers enrollment, attendance, grading, and separate portals for teachers and parents.
